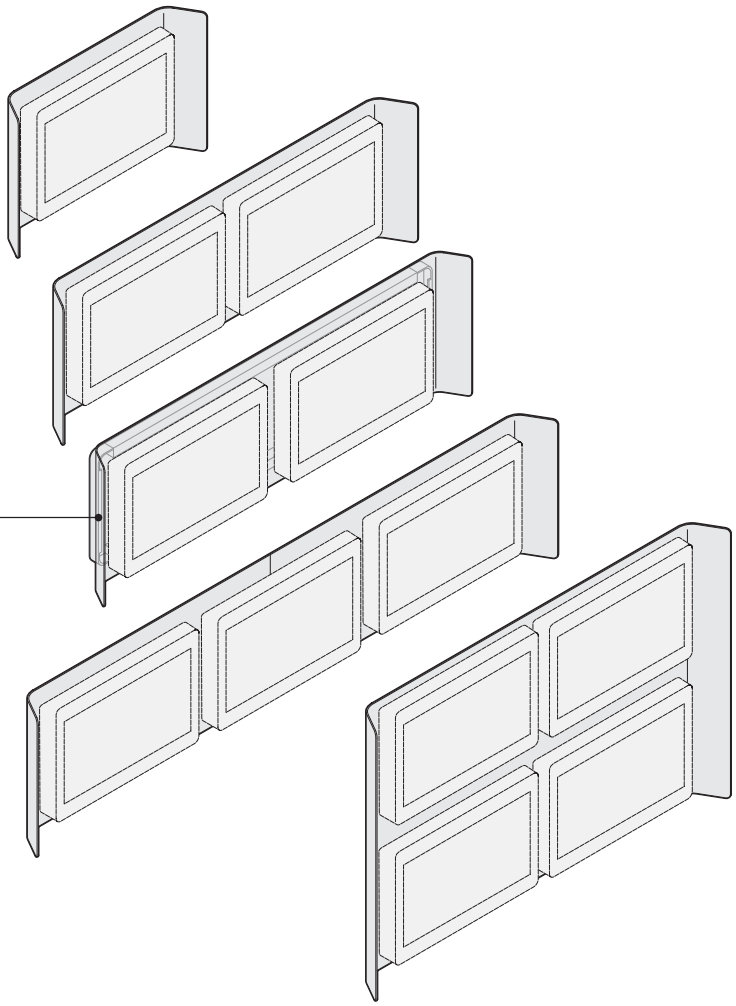
# Wall-Mounted Shrouds

**Wall-mounted shrouds** are available to support up to three 32", 42", 46", 55", or 65" monitors, (not included). Quad shrouds are available for 32" or 42" monitors. They are painted aluminum and available in platinum, arctic white gloss, near black, and midnight metallic.
*Tip: Specify the seismic option if needed. This option is not available on shrouds with CODEC cases because these versions are already seismic compliant and additional parts are not required.*

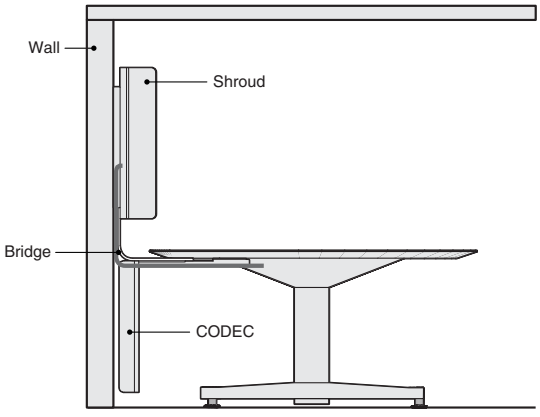
**Monitor brackets** are included and support most monitors.

**Shroud-mounted CODEC cases** are available for dual and triple 42" and 46" monitors.

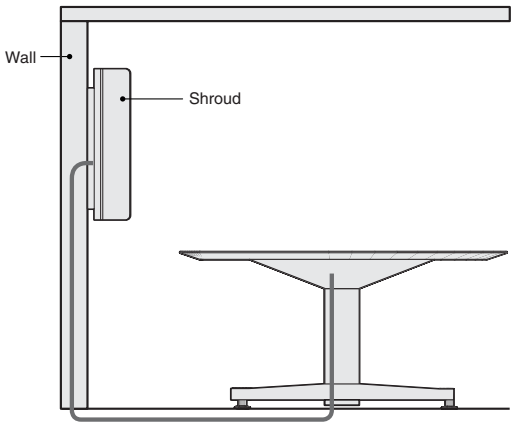
*Tip: The 42" shroud-mounted CODEC case was designed to accommodate a maximum 28"W, 16½"D, and 2½"H CODEC. The 46" shroud-mounted CODEC case was designed to accommodate a maximum 28"W, 19½"D, and 2½"H CODEC.*



*Tip: Wall-mount hardware is not included. To complete an installation, consult with your project architect to determine the mounting specifications for your installation site. Consult with your local building code officials for specific code requirements applicable to your installation.*



**The bridge** is an option on all single monitor shrouds, and dual 32", 42", and 46" shrouds. It tethers a detached table to the shroud and provides cable management. The bridge defaults to the finish selected for the shroud. The bridge is not attachable to the dual monitor shroud with CODEC (MTSWD32C).
*Note: Bottom of shroud will be 5" above table top.*

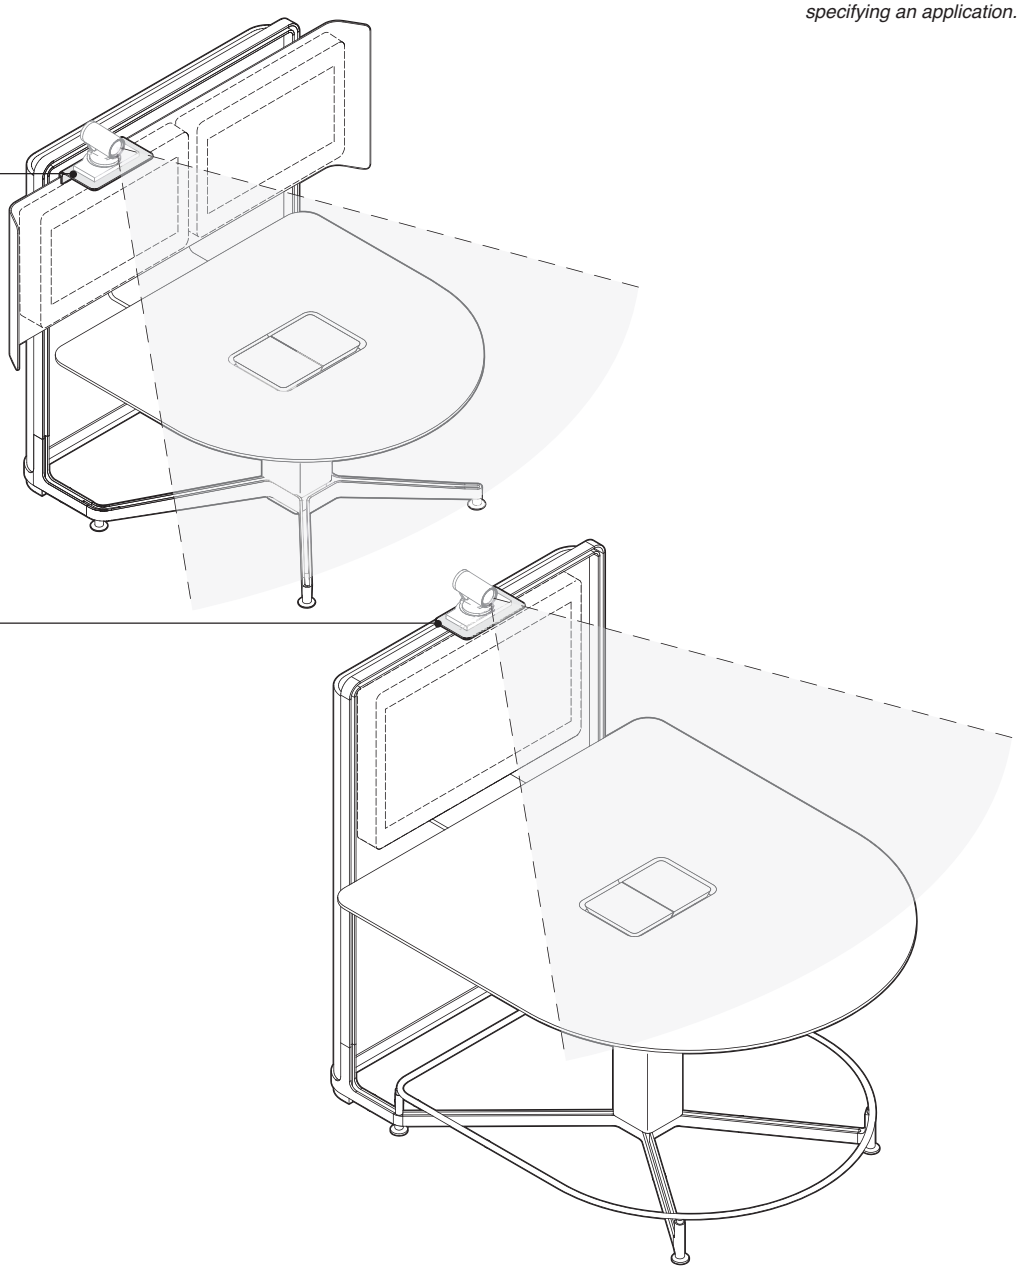


**If a table** is placed away from the wall, cables can be routed down the column, through the floor, and up the wall to the monitor. When coring the floor 2", conduit is recommended to easily fit the monitor extension cable HD15 connector.

# Camera Ledges

**Camera ledges** are available to support video conferencing applications in either shroud-mounted or totem-mounted options. *Tip: Cameras are not included.*

*Tip: Sight lines will vary by camera and should be taken into consideration when specifying an application.*



**Shroud-mounted camera ledges** can be mounted to all wall-mounted shrouds and the dual monitor totem shroud. They are available in platinum, arctic white gloss, near black, and midnight metallic. Shroud-mounted ledges include slot to accommodate camera mount.

**Totem-mounted camera ledges** can be mounted to any media:scape table with a totem and are available in platinum, arctic white gloss, and near black.

# CODEC Cases

**The CODEC case** is available 2½" thick or 5½" thick to accommodate most CODECs. They are mounted to the bottom of the bridge on tables with totems, or to the shroud bridge option available on all single monitor shrouds, and 32", 42", and 46" dual monitor shrouds. The perforated cover lets heat dissipate from the CODEC and allows access to hardware for services. The CODEC case is available in platinum, arctic white gloss and near black.

*Tip: The dual 42" and 46" shrouds and the triple 42" and 46" shrouds are available with a CODEC case stored behind the shroud. A bridge-mounted CODEC case would not be needed in this scenario.*

**A tether buckle** is included to secure the CODEC. A Kensington lock is not included but recommended for security.

*Tip: The 5½" thick CODEC case was designed to accommodate a maximum 5" CODEC height, 16" depth, and 20" width.*

*Tip: All CODECs may not fit. Check the dimensions of the CODEC before ordering a CODEC case.*

*Tip: An additional scaler and HDMI cable are needed to connect to the CODEC.*

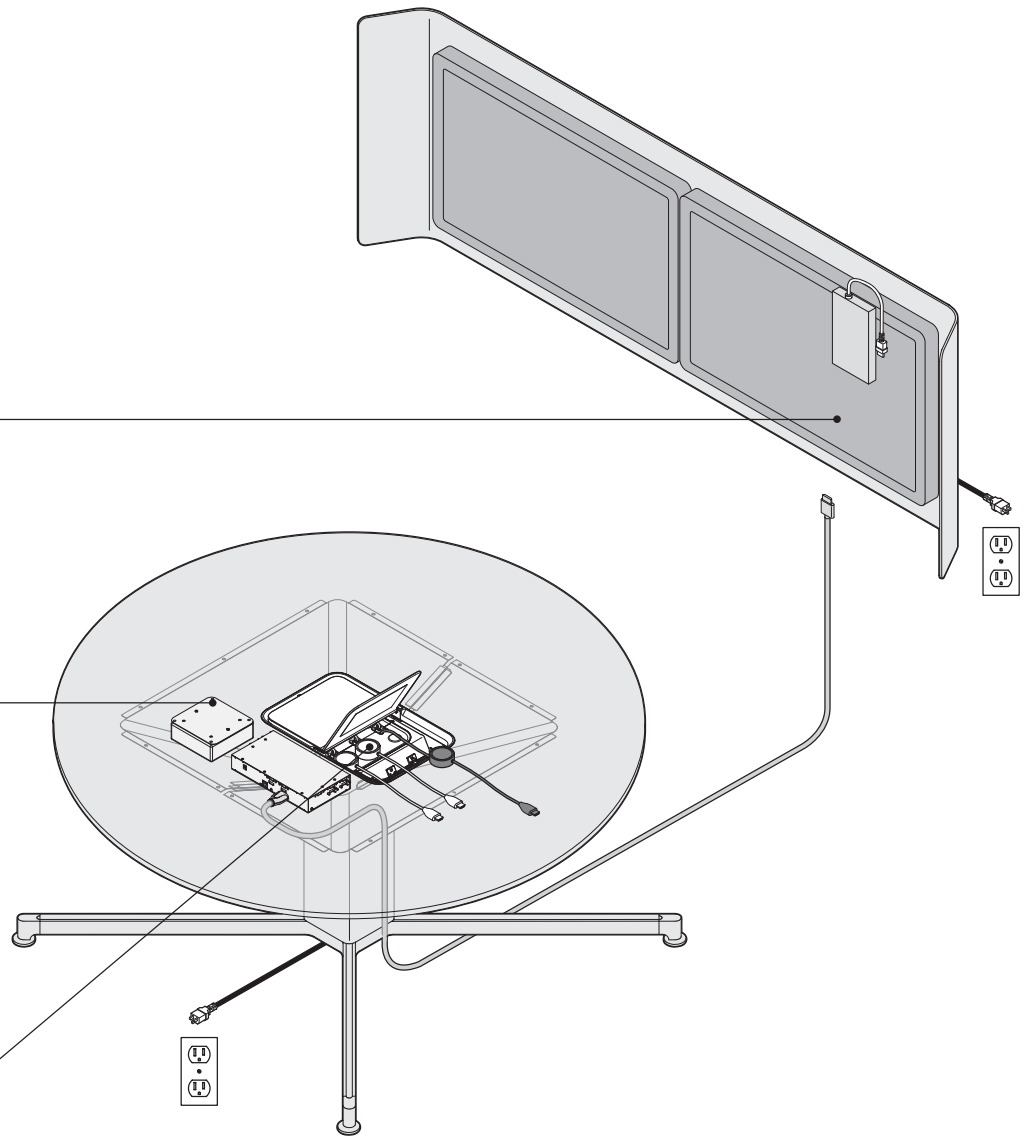
# media:scape Virtual PUCK

**Virtual PUCK** allows easy and efficient wireless content sharing from laptops and tablets on multiple media:scape displays. Virtual PUCK maintains the simple “Open, Connect, and Share” user experience, like the original media:scape PUCK interface.
▶Specifying, page 63

**Users** share content via a security-minded software application, complete with a simple and easy to use interface.



**Content** is shared on up to two displays.

**Virtual PUCK receiver** integrates directly with the media:scape digital switcher. It receives video content from the network connection, and shares the content to the switcher.
*Note: Virtual PUCK is designed to integrate with media:scape in a stand alone setting. Integration with additional systems cannot be accommodated at this time.*

**Virtual PUCK** works seamlessly with physical PUCKs in any media:scape application.

## Product Details

**Virtual PUCK application,** available for Windows or Mac laptops, allows users to wirelessly share content to one or two media:scape displays. Just like the "Open, Connect, and Share" experience of media:scape, users simply open the app, connect to the media:scape via a four-digit security code, and share content from anywhere in the room.

**The Virtual PUCK app** can be downloaded free of charge at www.steelcase.com.

**The Virtual PUCK manager** is a software application that runs on the Steelcase application server. It allows IT managers the ability to configure, monitor, and manage each Virtual PUCK on a customer's network. The Virtual PUCK manager is included with the purchase of a Virtual PUCK.

**The Steelcase application server** is an enterprise class platform utilizing virtual server technology to deliver centralized management, reporting, and analytics for Steelcase technology products, including Virtual PUCK.
▶Specifying, page 63

**Steelcase application server installation** is required prior to installing the Virtual PUCK manager. Additional information on the Steelcase application server can be found on page 64.
*Note:Steelcase application server features the management of Virtual PUCK and other future Steelcase technology products. Only one instance is required to be installed on the customer's network. The single instance of Steelcase application server can manage all Virtual PUCK receivers on the customer's network.*
*Note: Although the Steelcase application server is available at no cost, it is important to place an order for a valid license. This license will ensure future access to Technical Support and software updates.*
*Note: The Steelcase application server is not hardware, but rather a virtual server (operating system and software package) that delivers a centralized management system of Steelcase technology products.*

**Steelcase Maintenance Agreement**
**media:scape Virtual PUCK** includes a one year Steelcase maintenance agreement to provide an enhanced support system. The maintenance agreement covers:
- Software/firmware enhancements
- Expedited shipping for hardware replacements
- Prioritized technical support

**Maintenance agreement renewal** options are available for one, two, and three year periods.
▶Specifying, page 164

## Wiring and Cabling

**Virtual PUCK receiver and media:scape digital switcher** require a connection to the customer's network.

**HDMI cables** connect the Virtual PUCK receiver to the media:scape digital switcher. Connection constraints: Virtual PUCK utilizes the digital switcher's auxiliary ports and cannot be used in combination with other integrated systems, such as video conferencing, digital signage, and AV control systems like those used in media:scape Learn Labs.

## Mounting Options

**media:scape tables** host the Virtual PUCK receiver under the pyramid covers, in close proximity to the digital switcher.

**media:scape mobile** holds the Virtual PUCK receiver in the CODEC case.
*Note: An HDVC kit is required.*

**media:scape kiosk** houses the Virtual PUCK receiver in the boot cover, underneath the worksurface.
*Note: The kiosk cable kit option is required when specifying media:scape Virtual PUCK for use with media:scape kiosk.*

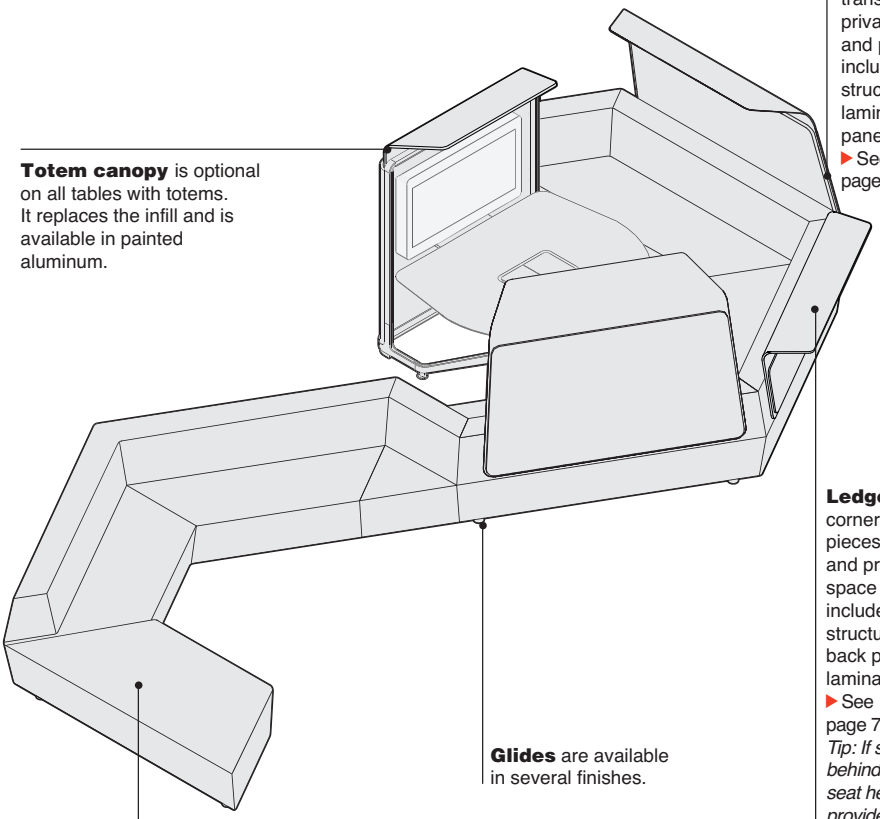
# media:scape Lounge

**media:scape lounge** creates collaborative work settings designed to support small teams of four to six people.
▶ Specifying, page 108

**media:scape lounge** offers seven lounge pieces: straight, straight inverted, backless, right corner, left corner, reverse left, and reverse right. The lounge is designed to be easily reconfigured in many different ways to accommodate multiple settings. There are three different fabric orientations to choose from.

**Due to the geometric shapes,** it is recommended to use one of the standard fabrics, vinyls, leather, or a non-patterned COM, COL, or COV. The use of solid fabrics is recommended with media:scape lounge settings. Steelcase will not pattern match fabrics which have a distinct repeating pattern.

*Tip: Canopy and ledge back panels are not available in full-fill or flat cut.*



**Totem canopy** is optional on all tables with totems. It replaces the infill and is available in painted aluminum.

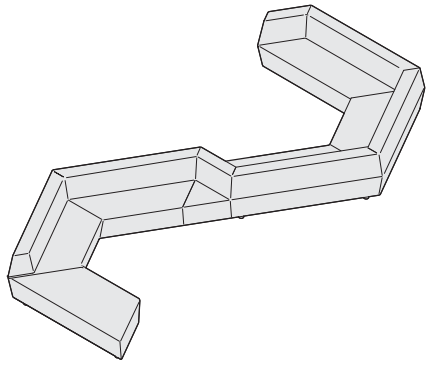
**Lounge canopy** is optional on all corner and straight lounge pieces. It transforms the degree of privacy providing an intimate and protected setting. It includes a painted aluminum structure, fabric panel, and a laminate or veneer back panel.
▶ See *Thought Starters,* page 7.

**Ledge** is optional on all corner and straight lounge pieces. It acts as a surface and provides additional space for collaboration. It includes a painted aluminum structure, laminate or veneer back panel, and an optional laminate or veneer topper.
▶ See *Thought Starters,* page 7.
*Tip: If specifying seating behind the ledge, maximum seat height should be 31" to provide appropriate leg clearance.*

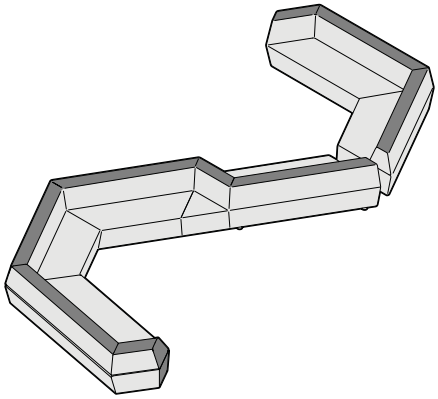
**Glides** are available in several finishes.

**Lounge fabric** is available in select Steelcase and Designtex fabrics.

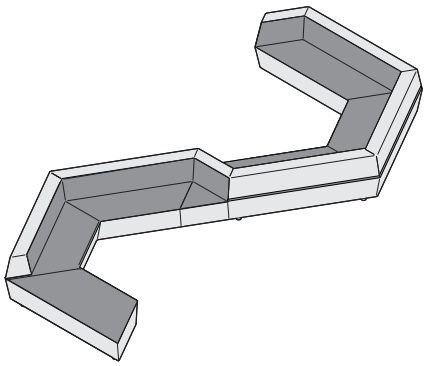
## Upholstery Orientations



**Same** - The entire lounge is one fabric.

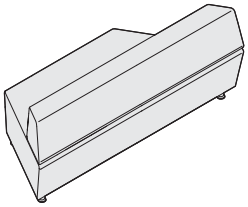


**Edge** - The top of the lounge is one fabric, along with the end of the corner unit. The remaining sides are a second fabric.

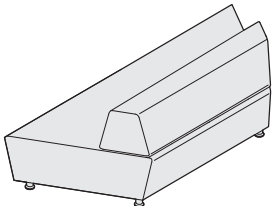


**Front seat and back** - The seat surface and the front of the back is one fabric and all other panels are a second fabric. The reveal on the back of the lounge is the same fabric as the seat surface and the front of the back.

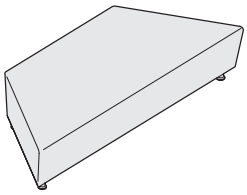
## Product Details



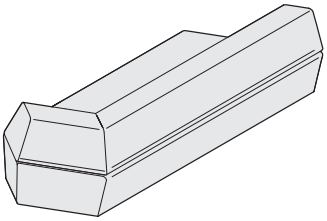
**Straight lounge** has a straight back which tapers to the front of the seat.



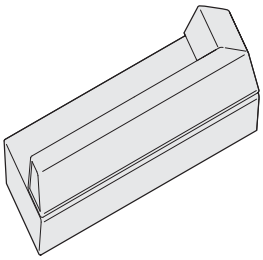
**Straight inverted lounge** has a straight back. It tapers from front to the back of the seat.



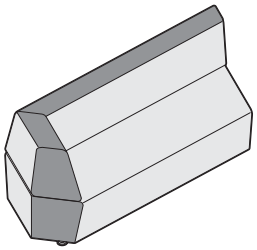
**Backless lounge** is the same shape as the straight lounge and tapers to the front of the seat.



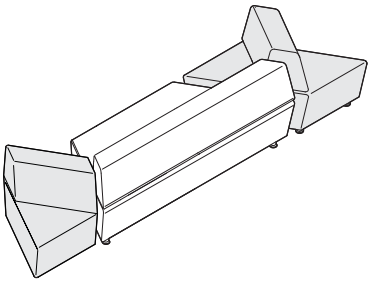
**Left corner lounge** is left-handed in a seated position.



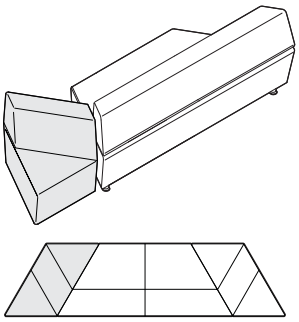
**Right corner lounge** is right-handed in a seated position.



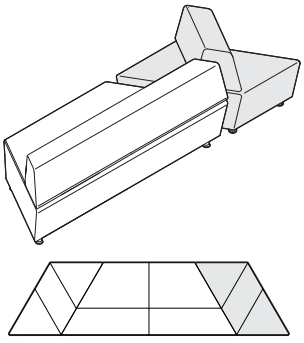
**The end of the corner lounges** will have the same fabric as the top when edge upholstery is specified.



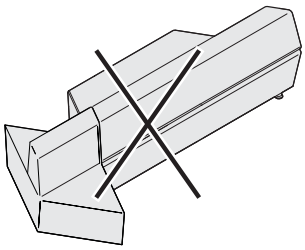
**Reverse lounges** are either right-handed or left-handed and provide the ability to transition seating from one side of an application to the other. They can be applied in either angled or straight applications.



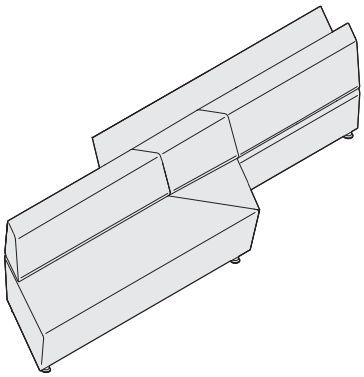
**Reverse left,** when fitted next to a straight lounge, provides an angle similar to the corner left.



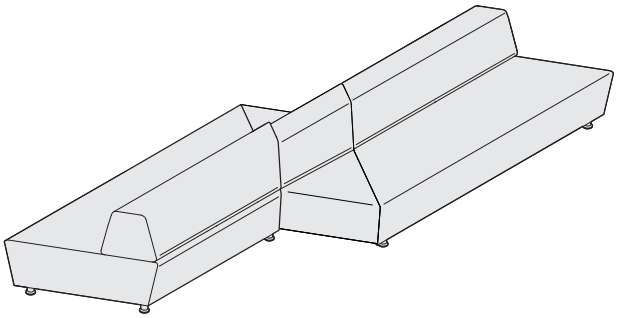
**Reverse right,** when fitted next to a straight lounge, provides an angle similar to the corner right.



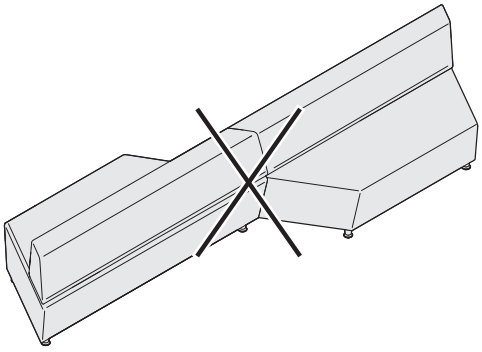
**Reverse lounges,** that are specified with incorrect handed orientation will not align with other lounge pieces.



**Use a reverse left** to transition seating from one side of the application to the other and have seating on the left hand side.



**Use a reverse right** to transition seating from one side of an application to the other and have seating on the right side.



**A reverse lounge piece** must be used to transition seating from one side of an application to another. Attempting to transition seating without a reverse will prohibit adjacent lounges from being ganged together.

## Surface Materials

**Upholstery**

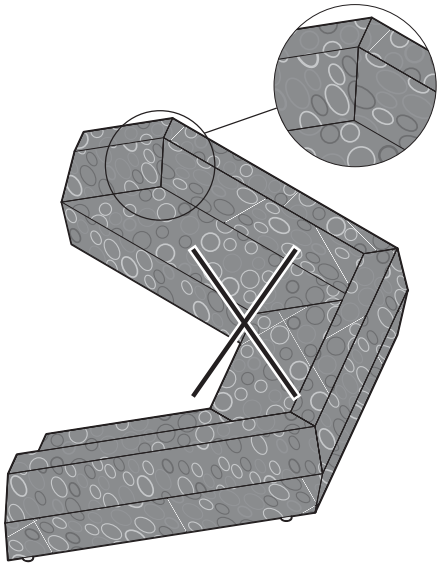
- Steelcase or Designtex fabric
- Fabric with soil-retardant treatment (option)
- Leather

▶See *Surface Materials,* page 154.

*Tip: Thread color that is associated with the more dominant fabric will be used throughout the upholstery. Therefore, with the multiple upholstery option, the thread may be a contrasting color.*

**Glides**

- 4140 Arctic White Gloss
- 4799 Platinum
- 4803 Near Black Metallic
- 8046 Polished Aluminum



**Solid non-repeat fabrics** are recommended for media:scape lounge because of the unique geometric shapes. When patterned fabrics are selected, patterns are not matched.

## Programs & Services

▶See the *Surface Materials Reference Manual* for further detail about programs and services offered for seating.

**The Customer's Own Material (COM & COL) Program** offers the opportunity for customers to select fabrics and leather that are not offered through the standard Steelcase surface materials program for use on Steelcase products. Avoid pattern fabrics and heavily grained leathers. Through the COM & COL program, Steelcase will test your materials for application on Steelcase products. Once approved, you can place your order. Steelcase will facilitate the entire ordering process and give you a production schedule. Steelcase will order the COM & COL fabric and leather directly from the textile manufacturer. For up-to-date information regarding fabric test results for all COM & COL fabrics and details regarding yardage requirements for most Seating lines, visit the COM Web site. To locate the COM Web site:

- Visit www.steelcase.com

**Soil retardants** are treatments that provide long-term soil and stain resistance to a fabric without affecting the shade or the integrity of the fabric. The following Steelcase Textiles are available pretreated with soil retardant. (You do not need to select the soil-retardant option for these fabrics and incur the upcharge.)
• Jacks
• Link
• Spyder

For information on soil retardant fabrics on Select Surfaces, please refer to the *Surface Materials Reference Manual*.

Soil-retardant treatment is available on all other seating fabrics at an additional upcharge per seating unit. To order this option, please select "Soil-Retardant Treatment" under "Optional Accessories."

For soil-retardant treatment on COMs, please select "Soil-Retardant Treatment" under "Optional Accessories." Minimums or additional yardage may be required. Please contact the vendor directly for specific information.

Extended lead times may be necessary for this service.

# Understanding and Specifying RoomWizard II

**Product Details**

RoomWizard II Room Scheduling System **126**

**Specifying**

RoomWizard II Room Scheduling System **130**

RoomWizard II Accessories **131**

# RoomWizard II Room Scheduling System

**RoomWizard II** is a web-based room scheduling system with touchscreen display.

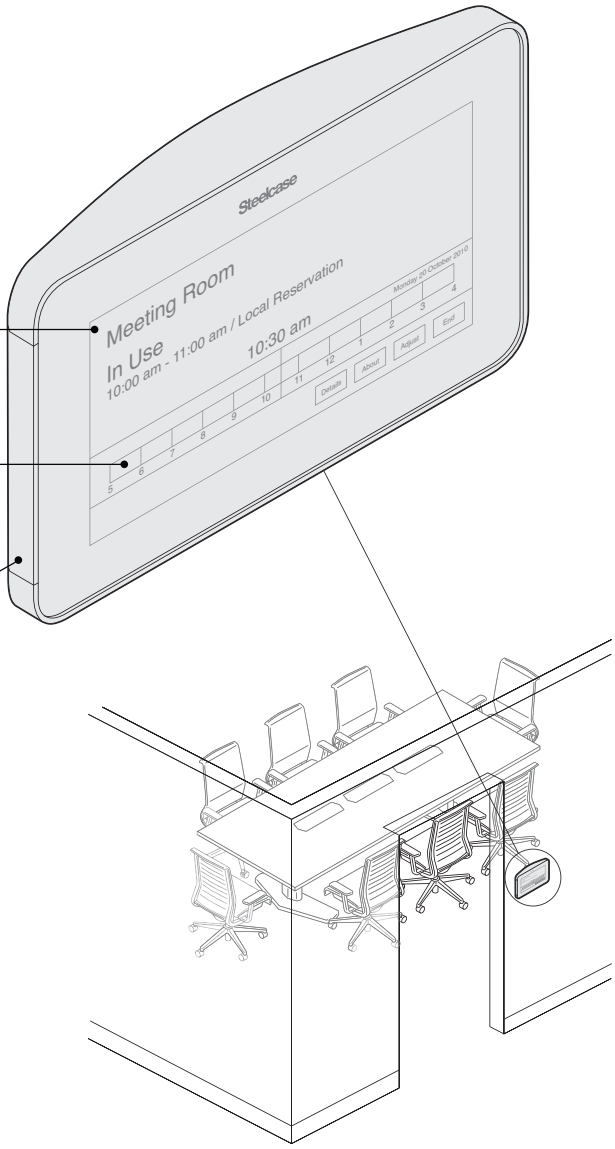
**Reserve** a room from any networked computer, smart phone, or RoomWizard II device.

**RoomWizard II** can stand alone or synchronize with systems like Microsoft Exchange, Lotus Domino servers, Google Apps, and several other third party software systems.

**Display** of the room's schedule, hostname, meeting purpose, meeting times, room details, and timeline are shown.

**Touchscreen** allows user to claim a room for an impromptu meeting, adjust meeting time, or end a meeting early.

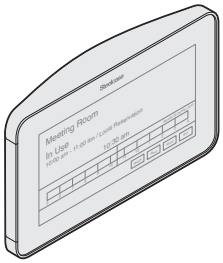
**Status lights** are bright red and green which signal a room's availability from a distance.



## Actual Dimensions

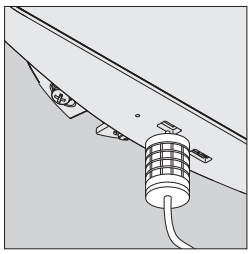
| | | Universal Mount |
|---|---|---|
| Width | 8⅛" | 7½" |
| Height | 5⅛" | 2" |
| Depth | 2¼" | 1" |
| Installation depth with mounting bracket | 2¼" | |
| Diagonal screen size | 7" | |
| Weight | 1¼ lb | |

## Product Details



**RoomWizard II** comes with everything needed to operate in classic mode, as a stand-alone system with standard firmware which is included. To operate in synchronized mode, the synchronization drivers must be purchased separately. *Tip: Firmware may be automatically updated via the internet or micro USB drive.*

**RoomWizard II** screen can be wiped clean by using a microfiber cloth.

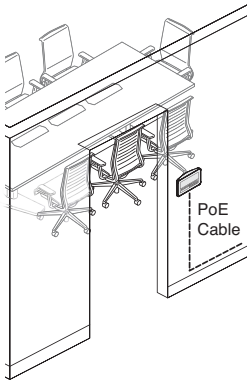


**Built-in security holes** allow RoomWizard II to be secured using a Kensington lock.

**Analytics console** records room occupancy and reservation patterns, then generates reports to provide insight into space utilization.

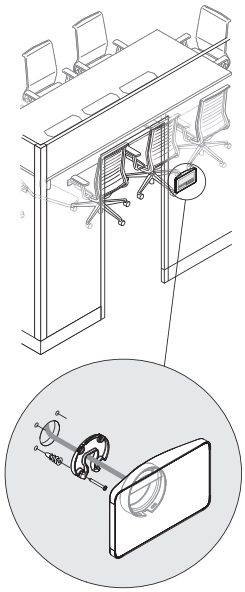
**Administrative console** manages, configures, and monitors all RoomWizards from a single interface. Both consoles are available for free download on the RoomWizard II support page at www.steelcase.com.

## Wiring & Cabling

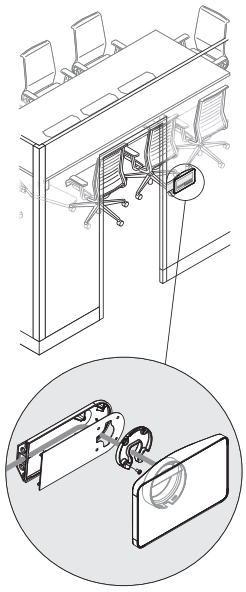


**RoomWizard II** connects to a network and is powered using Power over Ethernet (PoE). PoE cables run from the PoE switch typically located in the data closet. Industry standards set cable lengths at 100m. Contact your IT department to determine the PoE switch locations.

## Mounting Options



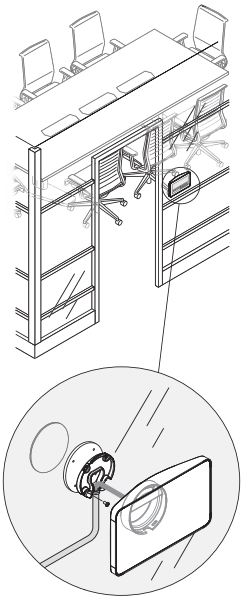
**The standard mount** comes with each RoomWizard II and allows it to mount directly to hard surfaces.



**The universal mount** is an option and is used to mount to architectural mullions. It can also work for glass wall applications.

**The universal mount with furniture hardware kit** is an option and is used to mount to FrameOne, Post and Beam, and other furniture products.

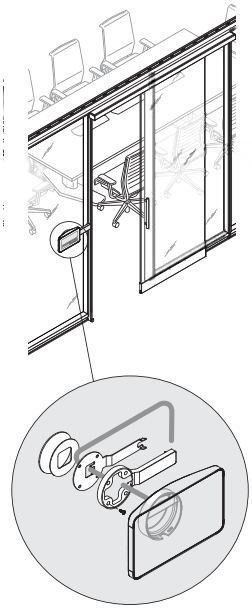
**Mounting RoomWizard II to media:scape** does not require a universal mount, so ordering the furniture mount hardware kit separately is recommended for that application.
▶See page 132



**The direct-to-glass mount** is an option and includes a vanity plate to visually conceal the hardware. It allows the RoomWizard II to adhere to glass surfaces.

**Recommended mounting height** is 54" from floor to top of unit.

**The junction box plate mounts** come in packs of five and are used to mount RoomWizard II to junction box plates.



**The V.I.A. mounting bracket** is an option that allows RoomWizard to be mounted directly onto Steelcase V.I.A. architectural walls. This option will require the PoE cable to be run from the floor to the RoomWizard.

**For the PoE cable to be run from the RoomWizard to the floor,** it can be inserted into the channel in the V.I.A. wall.

**When mounting the RoomWizard to V.I.A.** provide enough clearance for V.I.A. sliding doors.

**For single pane V.I.A. wall installations,** the V.I.A. mount can only be used if the exterior wall is flush with the frame. Otherwise, the standard RoomWizard glass mount is recommended.

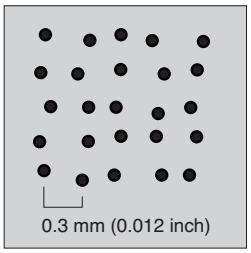
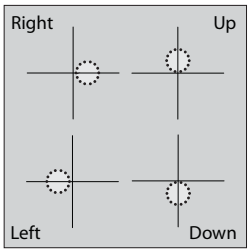
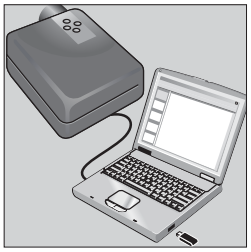
## Product Details





**ēno interactive whiteboards** feature a pattern invisible to the naked eye. The pattern consists of numerous intelligent small black dots that can be read by the ēno stylus. The pattern indicates the exact positions of the ēno stylus.



**Any Bluetooth® enabled computer (Apple or Windows-based) with the ēno App** installed can be used in conjunction with ēno to enable interactive whiteboard capability. Any projector can be used to project images from the computer to the ēno whiteboard.

**The ēno stylus** works with the ēno whiteboard to enable interactive capability with a computer. For example, when a computer based presentation is projected onto the ēno whiteboard, the stylus can be used to guide the presentation or interact with a computer program, similar to keyboard or mouse commands.

**Each ēno Classic and ēno Click interactive whiteboard** comes complete with:

- one ēno whiteboard with one of three dot patterns. Every ēno whiteboard features the e³ ceramicsteel writing surface
- one Bluetooth enabled stylus with one AAA battery

# Understanding and Specifying Steelcase Certified Refurbished Products

**Product Details**

RoomWizard II Room Scheduling System **150**

**Specifying**

RoomWizard II Room Scheduling System **151**

# Steelcase Certified Refurbished Products

**Steelcase Certified Refurbished Products** are pre-owned Steelcase products that undergo Steelcase's stringent refurbishment process prior to being offered for sale.

They are in 100% working condition and sold as refurbished product at a lower price. As these refurbished products have been unpacked and manipulated, they might exhibit some minor cosmetic imperfections, such as scratches, marks, or discolorations.

**Each Steelcase Certified Refurbished Product is:**

- Fully tested under the same requirements as a new unit.
- Put through a thorough cleaning process and inspection.
- Re-flashed with new firmware.
  *Note: Firmware version may not be the most current by the time product is received. New firmware upgrade files are posted at Steelcase.com and can be upgraded post-installation.*
- Repackaged (including appropriate manuals, cables, new boxes, etc.)
- Given a new refurbished style number and serial number.
- Placed into a Final QA inspection prior to being added to sellable refurbished stock.

Refurbishment procedures follow the same basic technical guidelines as Steelcase's Finished Goods testing procedures.

**Warranty**

Each Steelcase Certified Refurbished product includes a 1 year warranty.

**Availability**

Refurbished supply is very limited. It is recommended to check with a Technology Sales Consultant or SFT representative to see if an item is available for sale.

### Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of $65 U.S. per worksurface or top, plus the cost of the laminate.

**When processing orders for Open Line laminate** on c:scape and media:scape, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

*Note: Open Line laminate (OLL) is not available on media:scape lounge ledges and canopies.*

**Laminate Approval and Material Requirements**
To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:
- Visit www.steelcase.com

**For additional information,** refer to the *Surface Materials Reference Manual*.

## Wood

Applies to:
- media:scape tables
- ScapeSeries tables
- media:scape lounge ledges and canopies

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:
- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

## Custom Surfaces

**Customiz stain** is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A $425 stain-matching fee applies on CUSTOMIZ requests (Exception: The $425 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The $425 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A $5,000 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a $1,000 fee at any point within five years after the $5,000 initiation fee was paid. If the finish is not reactivated within five years after the $5,000 initiation fee was paid, the finish will be culled and the customer will need to pay the $5,000 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Ⓔ = Established

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual.*
